Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 3-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant has amended claim 1 to include method steps into an apparatus claim, which are given little patentable weight in defining the structure of the apparatus. It is not clear which statutory class the current claims are in. For the purposes of prosecution, the examiner has stayed with the originally presented apparatus. The examiner highly recommends using means plus function language to get around this confusion, but make sure that the means plus function is clear from the specification.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Miller et al.

Miller et al. shows an identification system card, which uses fingerprints as a form of univocal identification (via micro processor). Column 2, lines 71-75 shows that the intent of using the identification system with automatic vending. Figures 1 and 2 show the processing the geometric forms of the fingerprint.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4, and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller et al. in view of Rivalto.

Miller et al. shows all of the limitations of the claims except for specifying that the identification is linked to a customer profile with discounts (price) and past purchase data (prior depositing of currency or amounts paid).

Rivalto teaches, figure 1, an automated drive-up vending facility. The identification system is linked to a customer profile with discounts (price) and past purchase data (prior depositing of currency or amounts paid) in order to provide better customer service and provide marketing opportunities.

Based on the teaching of Rivalto, it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the automatic vending

systems of Miller et al. to incorporate the identification links of Rivalto in order to provide better customer service and provide marketing opportunities.

Response to Arguments

Applicant's arguments filed 2/22/05 have been fully considered but they are not persuasive. The arguments concentrate on how the inventions perform different functions, which is not relevant to an apparatus claim.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Cuff whose telephone number is (571) 272-6778. The examiner can normally be reached on 8:00 to 5:30.
